

Get to the top of Google the moment someone needs a **roofer**.

A simple, plain-English guide to how a Google Search ad campaign puts your business in front of local homeowners at the exact moment they are looking to hire — and how it helps you grow.

THE BASICS

What is a Google Search ad campaign?

When a homeowner in your area types something into Google — like "roofer near me" or "roof repair Derby" — the first results at the very top of the page are ads. They're marked **"Sponsored."** A Google Search campaign is how we get **Derby and Nottingham Roofing** into those top spots.

The "PPC" part stands for **Pay Per Click**. That means you only pay when someone actually clicks your ad and lands on your website. If nobody clicks, you're not charged. You're only ever paying for real, interested people — not for simply being seen.

Quick clarification — **this is not Google Guarantee**

This is a Google Ads **keyword campaign**: it puts your website at the top of the results as a sponsored listing.

It is **not** Local Services Ads (also called "Google Guarantee" — the ones with the green tick). That's a separate product that works differently. Worth knowing so there's no confusion later.

STEP BY STEP

How it works, start to finish

- 1 Someone searches**
A local homeowner types "flat roof repair Nottingham" into Google, actively looking to hire.
- 2 Your ad appears right at the top**
Above the normal results, ahead of competitors — the first thing they see.
- 3 They click through to your website**
Straight to a page built to turn a visitor into an enquiry, with your work and contact details front and centre.
- 4 They call or message you**
A warm lead who was searching for exactly what you do — ready to talk about their roof.

WHY IT GROWS YOUR BUSINESS

What this actually does for you

You show up straight away

No waiting months to climb the rankings. Your ad can be live and bringing in leads within days.

You only pay for real interest

Charges only happen when someone clicks through — never for people who just scroll past.

Targeted to your patch

Ads are shown only to people in Derby, Nottingham and the areas you actually cover — no wasted spend.

Caught at the right moment

You reach people the second they need a roofer — not hoping they remember you later.

You stay in full control

Turn spend up when you want more work, ease it back when the diary is full. Your call, any time.

You beat bigger competitors

A well-run campaign can put a local firm above national names for the searches that matter.

THE BIGGER PICTURE

How this fits with your website and SEO

Think of it as three ways to get found on Google. They're strongest working together.

Your website

Your shop window — always on, showing your work and making it easy to get in touch.

SEO

The long game. Builds your free rankings over time, but takes months to gather momentum.

Google Ads

The fast lane. Top of the page today, bringing enquiries in while your SEO builds up.

In short: ads bring the work in now, while everything else keeps building underneath.

FULLY MANAGED FOR YOU

What Innov8 Workflows handles

You focus on the roofs. We look after the campaign, end to end.

- ✓ **Keyword research** — finding the exact terms your future customers are typing in.
- ✓ **Writing and building your ads** — wording that gets clicks from the right people.
- ✓ **Local targeting setup** — making sure spend only goes on your service areas.

- ✓ **A landing page that converts** — the page your ad points to, built to turn clicks into calls.
- ✓ **Ongoing management** — monitoring, testing and fine-tuning to keep costs down and leads up.
- ✓ **Simple monthly reporting** — what you spent, how many clicks, and the enquiries it brought in.

YOUR INVESTMENT

Clear, honest pricing

Three simple parts, with no surprises:

Campaign setup

One-off. Keyword research, ad build, targeting and landing page — everything needed to launch.

£250

one-off

Monthly management

Ongoing optimisation, monitoring and your monthly report so the campaign keeps performing.

£200

per month

Google ad budget

Paid by you directly to Google — this is your spend on the ads themselves, not our fee. Start at the lower end and scale up as you see results.

£300–£1,000

per month, to Google

How the ad budget works

The £300–£1,000 goes **straight to Google** and pays for the clicks to your website — it's entirely yours to control and separate from our management fee. Many roofers start around £300–£500 a month, then increase it once they can see the enquiries coming in.

Ready to get to the top of Google, **Derby and Nottingham Roofing?**

Let's get your campaign live and start turning local searches into booked jobs. Just say the word and we'll get it set up.
